

Increasing interest of practitioners and academia in the simultaneous integration of resources within urban spaces

Analysis of 3 representative multifunctional projects in Brisbane, Melbourne and Sydney

# PRESENT

## WHAT ARE WATER PRACTITIONERS DOING EXACTLY TO ENABLE MULTIFUNCTIONAL OUTCOMES IN CITIES?

Outcome: Explanatory framework of conditions, processes, strategies and disciplinary dynamics in multifunctional projects

Projects often characterized by single objectives, low resilience and sub-optimal site integration

# PAST

# FUTURE

Water practitioners could use the explanatory framework to plan, design and implement multifunctional projects offering:

Several ecosystem services

More social acceptance

Low maintenance

Spatial heterogeneity

Lower costs
