11:00	Session 2: Continued Scenario Shaping Platform <ul style="list-style-type: none"> • Benefit Cost Analysis Tool • Water Mass Balance tool
11:30	Session 3: A user experience via Tools and Products The CRC research synthesis is a highly effective tool for exploring collaboration and innovation. The open-minded environment of a research synthesis design charrette (or facilitated group-think workshop) which is founded on science, and where no individual organisation leads or owns the conversation, supports an un-biased dialogue that enables the discovery of new and creative ideas. Many research synthesis projects are the foundation for on the ground outputs that facilitate a truly water sensitive city.
12:00	Session 4: Water Sensitive Cities Resources and Looking Ahead <ul style="list-style-type: none"> • Accessing CRCWSC Resources • Case studies – lessons learned • A knowledge platform – discussion and audience perspective • Evolution of the CRCWSC
1:20	Close
