

CRCWSC Special Session: Conference showcase

Monday 22nd July 2019

13:00 – 16:00

William Angliss Conference Centre
555 La Trobe Street

The 4th Water Sensitive Cities Conference was held in Brisbane in March. The conference brought together researchers and practitioners from a range of industries and disciplines to gain insights into the transition to water sensitive cities.

Proving that water sensitive cities research has moved into the adoption phase, the conference featured dozens of presentations that demonstrated how innovation has been generated by applying CRCWSC research knowledge to real-life projects.

This special session of the CRCWSC Victorian Regional Advisory Panel is bringing some of the key Victorian-based content from the Conference to a Melbourne audience.

Program

Session convenor: Euan Hind (CRCWSC Victorian Regional Manager)

#	Time	Topic
1	13:00	Welcome and introduction Euan Hind – CRCWSC
