

# Supporting the implementation of water sensitive greenfield development in Townsville

Wednesday, 26 February 2020

Reid Park Pit Lane Complex (Room 5)

9:00am-3pm

## AGENDA

### Objectives and Outcomes

This workshop is part of the Townsville action learning partnership, an initiative of the Cooperative Research Centre for Water Sensitive Cities and Townsville City Council.

The initiative is considering the urban planning, water servicing and governance arrangements needed to deliver water sensitive greenfield development in Townsville.

The research to date has identified 14 recommendations for reform. By attending this workshop, participants will be able to influence how key change interventions are operationalised and prioritised.

The objectives of this workshop are to:

- share key learnings and outcomes from the project to date, and
- co-develop pathways to support the implementation of water sensitive greenfield development in Townsville.

### Workshop Details
