Preferred Referencing for this Report:

FAWB (2009). *Adoption Guidelines for Stormwater Biofiltration Systems*, Facility for Advancing Water Biofiltration, Monash University, June 2009.

DISCLAIMER

The material contained in this document is made available and distributed solely on an “as is” basis without express or implied warranty. The entire risk as to the quality, adaptability and performance is assumed by the user. It is the responsibility of the user to make an assessment of the suitability of the material contained in this publication for its own purposes and the guidelines are supplied on the understanding that the user will not hold FAWB or any of its parties liable for any loss or damage resulting from their use. The information contained in this publication does not necessarily represent the views of the funding partners.

ACKNOWLEDGEMENTS

The *Adoption Guidelines for Stormwater Biofiltration Systems* were developed by the Facility for Advancing Water Biofiltration (FAWB), a Victorian Government Science, Technology and Innovation Initiative, and industry funding partners: Adelaide and Mount Lofty Ranges Natural Resources Management Board, SA; Brisbane City Council, Qld; Landcom, NSW; Manningham City Council, Vic; Melbourne Water, Vic; and VicRoads, Vic.

The guidelines were authored by Belinda Hatt (Monash University), Peter Morison (Monash University), Tim Fletcher (Monash University), and Ana Deletic (Monash University), with significant contributions from Sally Boer (EDAW) and Andrew Cook (EDAW).

Our appreciation goes to our industry collaborators, board of management, stakeholder representatives, research review and advisory panels, management, advisory and support staff, and visiting scholars and international collaborators who provided valuable input throughout the development of the guidelines. Our thanks also goes to Alan Hoban (South East Queensland Healthy Waterways Partnership), Shaun Leinster (DesignFlow), Peter Morison (Monash University), Toby Prosser (Melbourne Water), and Marianne Robertson (VicRoads) for their review of the draft document.

These guidelines would not have been possible without the research efforts of the FAWB project researchers and postgraduate students and we extend our thanks to them.

CONTACT DETAILS

The Facility for Advancing Water Biofiltration welcomes feedback on this document, which can be directed to fawb@eng.monash.edu.au

TABLE OF CONTENTS

CHAPTER 1: INTRODUCTION	7
1.1 WHAT ARE STORMWATER BIOFILTRATION SYSTEMS AND HOW DO THEY WORK?	7
1.1.1 HYDROLOGIC FUNCTION	8
1.1.2 TREATMENT PROCESSES	8
1.2 WHY MIGHT WE CHOOSE A BIOFILTRATION SYSTEM?	8
1.3 RESEARCH UNDERPINNING THE DESIGN OF BIOFILTRATION SYSTEMS	9
1.3.1 STRUCTURE OF THE RESEARCH PROGRAM	10
1.4 HOW TO USE THESE GUIDELINES	11
1.5 OTHER RELEVANT DOCUMENTS	12
1.6 REFERENCES	12
CHAPTER 2: PLANNING FOR BIOFILTRATION	13
2.1 INTRODUCTION	13
2.2 PLANNING FOR STORMWATER BIOFILTRATION	13
2.2.1 THE PRIVATE DOMAIN	14
2.2.1.1 Local Policy Leadership	16
2.2.1.2 Summary of the National Policy Landscape	18
2.2.2 THE PUBLIC DOMAIN	18
2.3 PERFORMANCE TARGETS FOR BIOFILTRATION	18
2.4 REFERENCES	20
CHAPTER 3: TECHNICAL CONSIDERATIONS	23
3.1 INTRODUCTION	23
3.2 CONCEPTUAL DESIGN	23
3.2.1 LINKING MANAGEMENT OBJECTIVES TO DESIGN	24
3.2.2 CASE STUDY	27
3.3 KEY DESIGN ELEMENTS	30
3.4 KEY DESIGN CONFIGURATIONS	31
3.4.1 LINED BIOFILTRATION SYSTEM WITH SUBMERGED ZONE	31
3.4.2 LINED STANDARD BIOFILTRATION SYSTEM	33
3.4.3 UNLINED STANDARD BIOFILTRATION SYSTEM	34
3.4.4 UNLINED BIOFILTRATION SYSTEM WITH SUBMERGED ZONE	35
3.4.5 BIO-INFILTRATION SYSTEM	36
3.5 DESIGN PROCEDURE	37
3.5.1 CONVEYANCE	38
3.5.2 SIZING	38
3.5.3 FILTER MEDIA SELECTION	39
3.5.4 SUBMERGED ZONE	41
3.5.5 DESIGN FLOWS	42
3.5.6 INLET ZONE	42
3.5.7 OVERFLOW ZONE	45
3.5.8 TRANSITION LAYER	46
3.5.9 DRAINAGE LAYER	46
3.5.10 UNDERDRAIN	49
3.5.11 LINER	51

3.5.12	VEGETATION	52
3.6	OTHER CONSIDERATIONS	55
3.6.1	GENERAL	55
3.6.2	INTERACTION WITH SERVICES	56
3.6.3	BIOFILTRATION SWALES	58
3.6.4	STORMWATER HARVESTING	58
3.7	REFERENCES	59
CHAPTER 4: PRACTICAL IMPLEMENTATION		61
4.1	INTRODUCTION	61
4.2	CONSTRUCTION AND ESTABLISHMENT	61
4.3	MAINTENANCE REQUIREMENTS	63
4.4	PERFORMANCE ASSESSMENT	66
4.4.1	WHY MONITOR?	67
4.4.2	SETTING MONITORING PROGRAM OBJECTIVES	67
4.4.3	DEVELOP THE MONITORING PROGRAM	68
4.4.4	QUALITATIVE MONITORING	68
4.4.5	QUANTITATIVE MONITORING	69
4.4.5.1	Preliminary monitoring	70
4.4.5.2	Intermediate monitoring	70
4.4.5.3	Detailed monitoring	72
4.4.6	DATA ANALYSIS AND INTERPRETATION	72
4.4.6.1	Benchmarks for performance assessment	73
4.5	CHECKING TOOLS	73
4.5.1	OPERATION AND MAINTENANCE INSPECTION FORM	74
4.5.2	ASSET TRANSFER CHECKLIST	74
4.5.3	BIOFILTRATION SYSTEM MAINTENANCE INSPECTION CHECKLIST	75
4.5.4	BIOFILTRATION SYSTEM ASSET TRANSFER CHECKLIST	76
4.6	REFERENCES	77
<u>APPENDIX A PUBLICATIONS</u>		
<u>APPENDIX B GUIDANCE FOR SIZING BIOFILTRATION SYSTEMS USING MUSIC</u>		
<u>APPENDIX C GUIDELINES FOR FILTER MEDIA IN BIOFILTRATION SYSTEMS</u>		
<u>APPENDIX D EXAMPLE MAINTENANCE PLAN</u>		
<u>APPENDIX E PRACTICE NOTE 1: <i>IN SITU</i> MONITORING OF HYDRAULIC CONDUCTIVITY</u>		
<u>APPENDIX F PRACTICE NOTE 2: PREPARATION OF SEMI-SYNTHETIC STORMWATER</u>		
<u>APPENDIX G PRACTICE NOTE 3: PERFORMANCE ASSESSMENT OF BIOFILTRATION SYSTEMS USING SIMULATED RAIN EVENTS</u>
